PROFILE

Product Designer and Design Engineer with experience across fintech, SaaS, banking, government and mobile products. I take products from requirements and user flows through polished UI, design systems, prototyping, developer handoff and implementation support.

SKILLS

Product Design: UX/UI, user flows, information architecture, wireframing, interaction design, prototyping, design systems, responsive design, usability testing, handoff, design QA

Design Engineering: Figma, FigJam, Framer, HTML/CSS, JavaScript, React, Next.js, Tailwind CSS, Supabase, GitHub, Cursor, Claude Code

EXPERIENCE

Product Design Engineer | IE Tech - Lagos, Nigeria | 2024 - 2026

- Design web and mobile products from requirements and user flows to high-fidelity UI, prototypes, reusable components and developer handoff.
- Designed Zenith Bank internet banking experiences for Sierra Leone and The Gambia across corporate banking, administration, payments, transfers and approval workflows.
- Designed Revsys tax collection and administration workflows for government use, and create product documentation while working with developers through implementation and QA.

Founding Product Designer | Swee - Remote | 2023 - 2025

- Own end-to-end product design for a creator-focused social platform, covering product flows, interaction design and implementation support.
- Built the design system from scratch and designed onboarding, content creation, discovery, engagement and account management.
- Work closely with engineering to define product behaviour, states and shipped interfaces.

Product Designer | Nerdy Eye - Lagos, Nigeria | Aug 2022 - Jun 2023

- Designed Quickshop e-commerce experiences and a kids learning platform for children and guardians across web and mobile.
- Also worked on a resort food-ordering product and VER donation landing page, creating user flows, prototypes and reusable UI components.
- Supported usability testing and iteration across product experiences.

SELECTED PRODUCT WORK

Zenith Internet Banking: Corporate and administrative banking flows including authentication, transfers, payments, beneficiaries, statements and maker-checker approvals.

Revsys: Government tax collection and administration product covering operational dashboards, collection workflows, reporting and admin controls.

QRCL: Multi-role estate access and security platform covering visitor QR access, scanning, entry/exit logs, incidents, offline sync, device controls and payments.

Flee: Fleet management SaaS covering vehicles, drivers, assignments, trips, live tracking, geofencing, alerts and reporting, with work in a React/TypeScript/Tailwind/Supabase environment.
